DETAILED ACTION

1. Claims 1, 3-7, 9-15 and 19-23 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yamamoto (US Patent 4,711,807).

Yamamoto discloses an insulating material comprising a silicon compound used in various electronic fields. The insulating material is prepared by forming a film on a substrate from reactive gases by means of plasma CVD. Examples of the reactive gases are mixed gases of compounds including silicon and other gases. Examples of gases including silicon include SiH₄ and Si₂H₆. Examples of other gases include hydrocarbons such as CH₄, C₂H₄ and C₂H₆ (column 2, lines 28-66).

Applicant argues that oxygenated precursors are taught by Yamamoto. Yamamoto teaches many non-oxygenated precursors. Applicant argues that Yamamoto teaches three components. "Comprising" language is used which is open language allowing for the addition of more components.

Response to Amendment

4. Applicant has amended the independent claims to recite specifics for the precursor. Lee teaches a Ta₂O₅ dielectric which does not meet the limitations of amended claim 1 which requires (Si-H) and (Si-Si) fragments. Endo teaches organosilane which does not meet the limitation of claim 1 that the silicon donor be "non-carbon containing and non-oxygenated". These two references have been removed from the art rejections.

Allowable Subject Matter

5. Claims 7, 9-15 and 19-23 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication should be directed to Examiner K. Duda at (571) 272-1383. Official FAX communications should be sent to (703) 872-9306.
